

BULB IDENTIFICATION

Every attempt has been made to make this application guide as current and accurate as possible at time of printing. However vehicles and products do change throughout the course of time so we highly recommend you check with your dealer, PIAA's Customer Service, or www.piaa.com to confirm applications prior to installation.

Bulb Identification

There are many types of bulbs in the automotive world. So how do you know what bulb is needed when replacing or upgrading?

1. The bulb itself will have markings on it. One of the markings will give you the industry number for the bulb type. This bulb shows that it is an 9004/HB1 type bulb.
2. If the bulb is from a headlamp, the bulb type is usually printed or molded into the lens. This lamp takes HB3 and HB4 type bulbs. Note: if using this method, a cross reference will most likely be needed.

3. If you are looking for the bulb type on an OEM lamp, the information should be printed in the Owner's Manual.

Headlight Bulb Cross Reference

- 1 An H4 bulb is also referred to as a 9003 or an HB2.
- 2 A 9004 bulb is also referred to as an HB1.
- 3 A 9005 bulb is also referred to as an HB3.
- 4 A 9006 bulb is also referred to as an HB4.
- 5 A 9007 bulb is also referred to as an HB5.
- 6 H.I.D. bulbs are referred to as D1S, D2R, D2S, D3S, D4R, and D4S.
- 7 H1, H2, H3, H7, H8, H9, H10, H11, H13, 880, and 881 bulbs are usually referred to as such.

Reference

* The bulb listed in the low beam column is a dual filament bulb that contains both high/low beams

X This vehicle has an HID option, check owners manual to ensure correct bulb type.
